

Scientific internship in University of Zilina (Slovakia)

Within the framework of TEMPUS programme “EcoBRU – Ecological education for Russia, Belarus and Ukraine” the staff members of Francisk Skorina Gomel State University can take scientific internship in the EU Universities. The senior teacher of the Department of Ecology A.S. Sokolov along with a large group of Belarusian, Russian and Ukrainian researchers had an opportunity to take such internship in Zilina (Slovakia).

During the internship the achievements of Slovak colleagues in the sphere of management and environmental protection were demonstrated, lectures were given by Slovak and Finland researchers, the process of scientific technical tools exploitation was demonstrated in practice (automated station of air monitoring, study of physical data of thermal insulating surfaces in the process of its functioning, computer modeling and urban traffic flow optimization, etc.) was organized.
